

AMENDMENTS TO THE SPECIFICATION

Please replace the last paragraph on page 1 of the specification, under the heading “Background of the Invention”, as follows:

-- Oils, especially oils comprised primarily of triglycerides and other non-polar constituents, are used in a variety of applications including uses as edible and non-edible oils. Edible oils that are high in triglycerides are especially desired and are typically used as food ingredients or as a medium for frying or cooking foods. Triglyceride rich edible oils are preferred for use because they have a high smoke temperature, meaning they do not readily smoke or burn when heated, making them ideal for frying or cooking, and have a desirable flavor. It should be pointed out that most edible oils sold in grocery stores are primarily comprised of triglycerides. Non-edible oils include ~~technical~~ technical oils such as lubricating oils and hydraulic fluids and fuel. --

AMENDMENTS TO THE DRAWINGS

The two attached sheets of replacement drawings correct the margins of FIGS. 2 and 3. These sheets replace the original sheets containing FIGS. 2 and 3. No new matter is added.

ATTACHMENTS: TWO REPLACEMENT SHEETS.
